EverFocus will showcase Live Demo for Japanese Commercial Truck at Taipei AMPA

With its intensive experience in automotive electronics and the mass transport market, EverFocus is now poised to cater to the demands of commercial vehicles with its in-vehicle systems. The Company successfully drove into the Japanese commercial vehicle market in the fourth quarter of last year. This year, it will be the third time that EverFocus is participating in the Taipei International Auto Parts & Accessories Show (Taipei AMPA), as it strives to aggressively build a new generation of vehicle safety monitoring and intelligent fleet management systems.

At TAIPEI AMPA, EverFocus will provide an actual demonstration of the Company's driving vision enhancement system for large fleet vehicles. The system, which will provide drivers with a visual surrounding of the road with its left and right exterior cameras as well as warning signals when turning, will help them to be aware of blind spots and subsequently reduce any accident on the road. The Company's car-based DVR will also be showcased. The EMV1200 FHD has both analog and digital video recording together with a playback system that can simultaneously receive and transmit video signals from analog and web cameras. The product uses M12 Aviation connectors and has received the

EN50155 Railway Compliance Standards; it has also passed stringent environmental performance testing as shown by its SAE J1455 certification. In its manufacturing process, EverFocus constantly strives to uphold efficiency and quality control. The Company's EMV1200 FHD and EMV400S FHD, part of its EMV series mobile DVRs, were the recipients of the 2018 Taiwan Excellence Award.

Xfleet, a web-based fleet management system, is also a major highlight of the exhibition. The in-vehicle 3G/4G/WiFi/GPS can transmit real-time monitoring images and vehicle body information to each monitoring site for data back-up. The monitoring center can then use Xfleet to check site information and keep abreast of the vehicle's real-time location and on-the-road images as well as perform driving behavior analysis and management personnel dispatching. The Xfleet Management System also adopts a web platform to support all kinds of tablet, PC and mobile devices. It also comes with a user-friendly Xfleet Mobile App, which keeps users up-to-date on various situations, further enhancing management efficiency and establishing a safer driving environment.

EverFocus invites you to come and check out its large-fleet vehicle solutions at the EverFocus Booth No. L0518 on the 4th floor of the Taipei Nangang Exhibition Center during the four-day Taipei International Auto Parts & Accessories Show (Taipei AMPA) from April 11 - 14, 2018.

About EverFocus Electronics Corporation

EverFocus Electronics Corporation (TWSE: 5484) is a leading integrated security solution provider. Our lineup includes CMS, IP, eZ, HD, mobile surveillance solutions, access control systems, as well as surveillance and access control peripherals. EverFocus has global offices in Taiwan, the U.S., Germany, China, and Japan.
