EverFocus Builds up the Complete Full HD Solution Targeting a Bunch of Markets

Taipei, Taiwan – EverFocus is pleased to announce the launch of their complete Full HD series products, including DVRs, Mobile DVRs and various types of cameras. With the launch of products combined with the existing CMS and Fleet management systems, EverFocus is the ideal one-stop Full HD solution provider worldwide offering flexible product selection.

The newly launched Full HD DVRs include 3 categories: entry-level, built-in DVD-burner, and DVD-burner plus hot-swappable models. The Full HD Mobile DVRs support WiFi, 3G/4G and GPS functions and are EN50155 / E-Mark certified. All models provide full HD image quality and are backward compatible with 720p, 960H and D1 cameras. Plus a diversity of camera options, such as dome, bullet, box, ball and PTZ types of indoor/outdoor cameras, giving the Full HD series a flexible selection to satisfy any markets.

DVRs	PARAGON FHD 16x4	ECOR FHD 16x1	ECOR FHD 4F/8F/16F
			
Video Input	16CH	16CH	4CH/8CH/16CH
DVD Burner	Yes (optional)	Yes (optional)	No
Hot-Swappable	Yes	No	No

Mobile DVRs	EMV1200 HD	EMV800 HD	EMV400 HD
			
Video Input	12CH	8CH	4CH
WiFi / 3G / 4G		Yes (optional)	
GPS		Yes (optional)	
Certificates	CE, FCC, EN50155, E-Mark		

Except the flexibility in product selection, EverFocus has never stopped focusing on customers' need. The eZ Controller function is designed to every single model of EverFocus' DVRs and Mobile DVRs, allowing users to control camera OSD settings and PTZ operation like zoom, focus, direction, preset or auto pan, directly from DVR/MDVR end through merely a coaxial cable.

The Mobile DVRs can work in conjunction with EverFocus Fleet Management Software. Xfleet is a Web-based fleet management system which integrates GPS positioning, 3G/4G mobile wireless communication, GIS (Geographic Information System) techniques and Geofence, allowing users to easily track, monitor and manage any type of fleet vehicles on a Web browser anywhere and anytime. With Xfleet, not only can you reduce overall costs by effectively utilizing resources such as vehicles, fuel, and manpower, but you can also improve the management efficiency and business performance by keeping and analyzing the historical records (graphical reports) of the vehicle data as needed.

The DVRs can be integrated with EverFocus' Central Management Software. Genie XMS is an open system integration platform that can be easily expanded or integrated with various systems or applications such as IVS, POS and access control systems. Most importantly, Genie XMS can analyze big data and information accumulated from all these systems in order to make prediction, to provide instant response and even to optimize business performance, creating long-term value for clients across various verticals and industries.

Genie XMS also features its strong compatibility and interoperability which allows it to connect all sorts of devices including IP cameras, NVRs, DVRs, I/O devices, smart mobile devices and access control products. Therefore, it can be tailored to meet a variety of needs and have a wider range of application. Together with the Web-based platform advantage, users can simply access the surveillance system from any remote site through a web browser.

The Full HD solution covers a wide variety of markets to suit any possible demand. Through integration, not only the business owners or operators can monitor the whole surveillance environment anywhere and anytime, but the data captured from the surveillance products can also be translated into valuable reports, supporting business owners or operators to make up decisions.
